*Main activities:* Development of the digital and print versions of the Global Gender Gap Report.

Link: <https://accurat.it/work/wef>

July 2019

Client: **IBM Italia** (IT)

Role and responsibilities: Tech Lead for 2019 IBM Think Summit “Città della Tecnologia” web app

Main activities: Development of a mobile-first web app that generates single and aggregated “flag-like” data visualizations based on user data coming from in-app surveys.

Link: <https://accurat.it/work/ibm>

June 2019

Client: **Lavazza** (IT)

Role and responsibilities: Tech Lead for Lavazza “Legend 2019” event live data visualization web app

Main activities: Development of a data visualization which used real time data collected using IBM Watson to display social interest and speech tone analysis insights during the event.

February 2018

Client: **RCT Systems Japan** (JPN)

Role and responsibilities: Tech Lead for DaVinci platform

Main activities: Development of a cloud-based application that analyses and visualizes visitors traffic data along with sales data in stores and shopping centers.

Link: <https://accurat.it/work/rctj>

August 2017

Client: **Atlas of Caregiving** (US)

Role and responsibilities: Senior Full Stack Developer and Tech Lead for Atlas CareMap web app

Main activities: Development of the digital CareMap app, a tool to help family caregivers, care coordinators, healthcare professionals, and social workers better understand and visualize the network of relationships between those involved.

Link: <https://atlascaresmap.org/>

March 2017

Client: **TED + Target** (US)

Role and responsibilities: Full Stack Developer for Data Portraits digital tool

Main activities: Development of a mobile-optimized app to generate ready-to-print artistic designs based on real-time data coming from surveys collected on-site.

Link: <https://accurat.it/work/ted-target>

October 2016

Client: **Google News Lab – Alphabet** (US)

Role and responsibilities: Front-end Developer for “Google Trend – U.S. Elections Project” Responsive Website

Main activities: Development of a mobile-first web app with different interactive visualizations providing insights about election trending searches on Google categorized by topic.

Link: <http://www.worldpotus.com/>

April 2016

Client: **The Intercept** (US)

Role and responsibilities: Front-end Developer for Google & White House visualization, featured in the article “The Android Administration”

Main activities: Development of an interactive visualization, showing the network of relationships between Google and White House.
